

STAINLESS STEEL PROFILES

Stainless Steel Profiles

The profile division engaged in manufacturing and exporting stainless steel angles, flats, special profiles like channels (tapered and non-tapered), unequal angles and beams in an extensive size range.

This division has all in-house facilities for rolling, straightening, shot blasting, solution annealing, pickling and buffing, and a well-equipped laboratory with testing facilities to ensure high product quality. This division has got a high demand in the international market because of its superior quality products and on time delivery.

Auto Packing:

- Angle/Flats/Special profile packed in 500 to 1000 kg weight in fully automatic, auto packing bundling machine. This automatic machines carry all the bars without any manual operation from pickling line. This machine makes all the bundle in auto sequence and wrapped top & bottom by LLDPE poly film and radially wrap by another LLDPE film to make it air tight. Finally wrapped bundle strapped by metal bands at equal interval by automatic signode strapping. We provide bundle identification tag at the bundle end. The identification labels and respective grade color code at both ends.

Applications of Profiles:

- Used in the construction of buildings because of the durability
- Used in hoardings or billboards because of the strength and non-corrosive properties.
- Used in transmission and communication towers because of the strength and non-corrosive properties.
- Used in the power industries because of heat resistance.
- Used in the ship building industries because of non-corrosive properties.
